DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “22” has been used to designate both a steam inlet (Fig. 1) and a drain pipe (Fig. 2). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to because Fig. 2 incorrectly indicates the flow direction of drain pipe 23. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5- 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5-7 and 26 contain the trademarks/trade names SCOSOx and SCONOx. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods

themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademarks/trade names are used to identify/describe catalysts for the removal of sulfur oxides and nitrogen oxides, respectively, and, accordingly, the identification/description is indefinite.

Claim 9 recites the limitation "the opening" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 9 recites the limitation "the supply pipe" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation "the opening" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation "the supply pipe" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitation "the opening" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitation "the supply pipe" in the second and third lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 25 recites the limitation "the at least one drain pipe" in the first line of the claim. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 5- 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: Boegner et al. (U.S. Patent No. 6,119,450) is considered the closest prior art. Boegner teaches a catalyst regeneration apparatus in which a sulfur oxide removal catalyst and a nitrogen oxide removal catalyst are placed in series. However, Boegner does not teach or render obvious a recirculation apparatus or a means for simultaneously regenerating both catalysts as set forth in the instant claims.
